**6. An explanation of the rule, including the agency's reasons for initiating the rule, including the statutory citation to the exemption from regular rulemaking procedures:**

The Governor's Medicaid Reform Plan, as announced on March 15, 2011, includes proposals to reduce nonfederal expenditures for the AHCCCS program by approximately \$500 million during state fiscal year 2012. To achieve some of these reductions, the AHCCCS Administration is proposing limitations to covered inpatient days for adults.

Notices of Exempt Rulemaking

In addition, this rulemaking proposes changes to current rules regarding limitations on providers charging members for services.

A.R.S. § 36-2907(D) states that AHCCCS shall adopt rules necessary to limit, to the extent possible, the scope, duration and amount of services, including maximum limitations for inpatient services that are consistent with federal regulations for the Medicaid program. Those federal regulations require (1) that the State Plan for Medicaid must specify the amount, duration, and scope of each covered service, (2) that services must be sufficient in amount, duration, and scope to reasonably achieve its purpose, and (3) allow each state to place appropriate limits on a service based on such criteria as medical necessity or on utilization control procedures. 42 CFR 440.230. Specifically, the United States Supreme Court has upheld limitations on services such as inpatient hospital services, noting that “Medicaid programs do not guarantee that each recipient will receive that level of health care precisely tailored to his or her particular needs” and “gives the States substantial discretion to choose the proper mix of amount, scope, and duration limitations on coverage, as long as care and services are provided in ‘the best interests of the recipients.’”

*Alexander v. Choate*, 469 U.S. 287, 303 (U.S. 1985). This proposed rule implements the statutory provision consistent with federal regulations. The limitations to services included in the Arizona State Plan for Medicaid as described in this rule will be included in a State Plan Amendment submitted to the federal government in accordance with requirements for the Medicaid program.

At this time, the AHCCCS Administration is proposing annual limits for inpatient hospital days for adults.

In light of the proposed expansion of limits to services, AHCCCS undertook a review of its rules regarding the registered providers charging member for services. Federal Medicaid regulations, specifically 42 CFR 447.15 and 447.20, require health care providers participating in Medicaid must accept the Medicaid payment as payment in full (plus any member cost sharing permitted by the Medicaid agency). Those regulations also place restrictions on the ability of providers to attempt to collect from the member or third parties the balance of a bill paid by Medicaid. State law, specifically A.R.S. § 36-2903.01(L) requires AHCCCS to establish procedures applicable to providers that attempt to collect from a member or third party an amount that exceeds the amount that is or should have been reimbursed by the System. This rulemaking: (1) clarifies the existing exceptions to the general prohibition on billing members for services, (2) explicitly addresses charging members for services that are excluded or are subject to limitations, and (3) simplify the requirements for obtaining a member’s written consent to direct filing in a manner that balances the administrative burden to the provider yet affords reasonable notice to the member of his or her financial responsibility.

**7. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

No studies were relied upon for the implementation of this rulemaking, but analysis of the member utilization of inpatient hospital days reported through claims and encounters for dates of service during SFY 2010, has assisted the AHCCCS Administration in arriving at the proposed limitations. Prior to proposing this rule, AHCCCS reviewed historical information regarding utilization of the services limited by the proposed rule. Based on that review, AHCCCS determined that at least 96% of utilizing members would remain unaffected if these limitations are implemented.

**8. A showing of good cause why the rule is necessary to promote a statewide interest if the rule will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable

**9. The summary of the economic, small business, and consumer impact:**

AHCCCS estimates that the limitations on inpatient days will reduce total expenditures by approximately \$64 million in combined state and federal funds for the last three quarters of the state fiscal year ending June 30, 2012 and approximately \$85 million for the following state fiscal year. It is difficult to estimate with any degree of certainty whether, or to what extent, this will result in less care being provided. As set forth in rule, in many instances health care providers are permitted to charge patients for services provided but not paid for by AHCCCS as a result of these limitations. It is equally difficult to estimate with any degree of certainty to what extent this rulemaking may result in health care providers rendering care without adequate compensation from sources other than AHCCCS.

**10. A description of the changes between the proposed rules, including supplemental notices, and final rules (if applicable):**

**H.** Review of claims and coverage for hospital supplies.

1. A contractor may conduct a review of any claims submitted and recoup any payments made in error.
2. A hospital shall obtain prior authorization from the appropriate contractor for nonemergency admissions. When issuing prior authorization, a contractor shall consider the medical necessity of the service, and the availability and cost effectiveness of an alternative treatment. Failure to obtain prior authorization when required is cause for nonpayment or denial of a claim. A contractor shall not require prior authorization for medically necessary services provided during any prior period for which the contractor is responsible. If a contractor and a hospital agree to a subcontract, the parties shall abide by the terms of the subcontract regarding utilization control activities. A hospital shall cooperate with a contractor's reasonable activities necessary to perform concurrent review and shall make the hospital's medical records pertaining to a member enrolled with a contractor available for review.
3. Regardless of prior authorization or concurrent review activities, a contractor may make prepayment or post-payment review of all claims, including but not limited to a hospital claim. A contractor may recoup an erroneously paid claim. If prior authorization was given for a specific level of care, but medical review of a claim indicates that a different level of care was medically appropriate, a contractor shall adjust the claim to pay for the cost for the appropriate level of care. An adjustment in payment for a different level of care is effective on the date when the different level of care is medically appropriate.
4. A contractor and a hospital may enter into a subcontract that includes hospital claims review criteria and procedures if the subcontract meets the requirements of R9-22-715.
