4. Demonstration of compliance with A.R.S. § 49-471.08 expedited rulemaking:

The department is proposing to declare this as an expedited rule making action as described in A.R.S. § 49-471.08(A).

A.R.S. § 49-471.08(A)(1):

Demonstration that the rule or ordinance making is substantially identical to the sense, meaning and effect of the federal or state rule or law from which it is derived.

Rule 321 is substantially identical to 40 CFR 60, Subpart WWW.

Rule 360 is substantially identical to 40 CFR 60, Subparts A, B, D, Da, Db, Dc, Ec, F, Ga, J, Ja, KKK, LLL, CCCC, IIII, JJJJ, LLLL, OOOO, and Appendices.

Rule 370 is substantially identical to 40 CFR 63 Subparts A, N, S, X, CC, HH, II, JJ, CCC, DDD, HHH, LLL, TTT, ZZZZ, DDDDD, UUUUU, DDDDDD, JJJJJJ, VVVVVV, WWWWW, DDDDDDDD, EEEEEEE, and HHHHHHH.

Rule 371 is substantially identical to 42 CFR 72, 75 Acid Rain.

Appendix G is substantially identical to 40 CFR 50 with appendix C; 40 CFR 51 with Appendix S; 40 CFR 53; 40 CFR 58 with Appendices D and E; 40 CFR 60 Appendix A-7; 40 CFR 75, Appendices A, D, and F.

A.R.S. § 49-471.08(A)(2):

Written finding by the Control Officer setting forth the reasons why the rule or ordinance making is necessary and does not alter the sense, meaning or effect of the federal or state rule or law from which it is derived.

This rulemaking is required to update the applicability dates in these rules. It incorporates subparts that have been passed by the federal government which are required to be implemented by the department. Rules 321, 360, 370, 371, and Appendix G do not alter the sense, meaning or effect of the state rules and federal regulations from which they are derived, as they incorporate language that is essentially the same as the state's applicable rules and the federal code of regulations.

On October 2, 2012, the department requested delegation authority from the EPA for primary authority to enforce 40 CFR 60, Subpart FFFF—Emission Guidelines and Compliance Times for Other Solid Waste Incinerator Units that Commenced Construction on or before December 9, 2004; and 40 CFR 60, Subpart MMMM—Emission Guidelines and Compliance Times for Existing Sewage Sludge Incineration Units. On August 1, 2013, the EPA declined the department's request, citing the Clean Air Act, Section 111(c). The subparts are emission guidelines and are not delegable to the department. Federal standards apply to new facilities and can be directly delegated to the department by the EPA. Federal guidelines apply to existing facilities and provide recommendations for the department to use in the drafting of locally enforceable regulations that can be then incorporated into the federally enforceable State Implementation Plan. The EPA letter stated that if these types of sources are located within the department's jurisdiction, then the department should begin developing regulations for these sources. There are no sources currently within the department's jurisdiction, therefore no additional rulemaking is required at this time.

A.R.S. § 49-471.08(A)(3):

Demonstration that fees established in the rule or ordinance do not exceed limits specified in § 49-112.

Rules 321, 360, 370, 371, and Appendix G do not establish fees. Any costs associated with these rules will come from permit application fees for sources obtaining a permit revision to reflect new emission limits, due to applicability of a new standard. Therefore, fees associated with these rules will be exactly the same as fees associated with similar permits and would not exceed any limits specified in § 49-112.

5. <u>Public comments regarding the proposed rulemaking:</u>

This is a proposed expedited rule making. Written comments will be accepted if received between the date of this publication and December 30, 2013 by 5:00 PM. Written comments may be mailed, e-mailed or hand delivered to the department. Written comments received during the comment period will be considered formal comments to the expedited rulemaking and will be responded to in the Notice of Final Rulemaking.
